is brought into the melee by what seem to be random circumstances that as the story unfolds prove to be perhaps not so random. Love, family, God, religion, politics, right versus might, some entity or entities other than politicians really running things behind the scenes, secret societies with secret insignias and pins, murder, mayhem, and more pop their heads up throughout the book. Wallis, the main character, and her husband Norman are lawyers working in the same law office. They are the parents of brilliant pre-pubescent Ned with strong ties to one another and their son. Little do they know that one day the calm life they enjoy living will be turned into one filled with dangers that threaten not only their lifestyle but their very beings. There is much to sort out and deal with and by the end of the book the resolution is not completely determined so my guess is that there will be another book to follow this one.

I think I've found a new favorite author for thrillers! The List is full of intrigue, unique paradigms, and promising characters. Martha Carr's world of power struggles and cells of operatives in ever day life kept me up very late on work nights - I definitely couldn't put it down!

Kindle Unlimited, think actually got one of her books from one of my freebie sites and have now hit the finish line with 6, at least for this series, and not being a huge fan of 'thrillers' that is saying that she has held my attention. Would do rundown of story, but just read the blurb and any reviews that come in, or better yet read the books listed below, better than any blurb or review. See the pretty stars up there...that's all you need to know.

Martha Carr takes you on a wild ride that creates conspiracy and makes you think "wow what if?" Government conspiracies are so rampant throughout the world and The List could just be a new one that may just make sense. What a journey from start to finish. Clandestine meetings, coded messages, cell phones that are more than just the average device. Murders that look like suicides or natural causes of death. Car chases, foot chases, buildings exploding; everything nee

Government conspiracies are so rampant throughout the world and The List could just be a new one that may just make sense. What a journey from start to finish. Clandestine meetings, coded messages, cell phones that are more than just the average device. Murders that look like suicides or natural causes of death. Car chases, foot chases, buildings exploding; everything needed in a great spy thriller and more. Our main character Wallis Jones makes for a great leader in this chilling novel where even children are not safe. Not one to cower to many people Wallis is just what we need to give us hope for a great ending. After all there is always hope. Don't miss this great thriller.
