I love the 80's ya'll. I mean I was born in the 70's but still! And when Cath and Scott write to each other they talk about all kinds of 80's music and things like that because this is set in the 80's and they talk about new music coming out and it made me flip my top :-D

To my knowledge or memory, I have never read a book like this one and I wasn't sure in the beginning but I just loved it. The author's have written it in a letter format. Cath and Scott, who have been best friends since childhood are writing letters to each other. Cath went off to college and Scott didn't for certain reasons. So everything in the book is written in letters back and forth. Even when they visit each other it will be written in a letter from one to the other about what went on while visiting. I know it sounds really weird and some parts I did want to hear about in person, but for the most part it worked out just fine.

God! I want to tell everything that happened in this book, but I can't. Cath and Scott go through a lot of heartaches during the book. There are divorces and death, fights and jealous weirdo's, finals and exams, running and starting a band - so many things. I wish I could have had a pen pal friend from when I was little. I do have a pen pal but not like this, I want one of my friends from childhood. OH well.

I loved where this went with the love story. It was so perfect, but you have to wait until the end and go through a lot of different trials with people and stuff. It's not what your thinking either. And for those of you that don't like insta-love, (I don't mind it) there is none. For those that love big ole smut scenes, there is none. It's just a really, really good book about life and love and what more do you want =) I'm happy with it and I am adding it to my huge Amazon Wish List (well one of them at any

rate)

It's written in letter format, which I admit, I quite like. And it was funny and sad all at once. Like I had FEELINGS there. I don't get feelings??? What is this nonsense. And while there was a small leaky bucketful of things that annoyed me, I ultimately liked how real it felt.

But I also liked how they

maintain quite a platonic relationship for most of the book.

The entire book was written in the form of letters between two friends -- yes, snail mail !! I found this format enjoyable and enjoyed the many references to the 1980's -- from Tab cola -- (I am one of a few who still drink it) to REM songs and lyrics!

We meet Cath -- who is adjusting to her first year of college. She is also struggling to come to terms with her father leaving her mother, after getting his secretary pregnant.

We also meet Scott -- who is working in his father's men's clothes store back home -- having not applied to any colleges. He is a song-writer and a member of a band.

The correspondence between Cath and Scott extends to a whole other cast of characters (boyfriends, girlfriends, roommates, family). The story was realistic and fast-moving. I liked the characters and how they were developed. The ending was a bit predictable, but satisfying.

I highly recommend

This book wasn't even on my radar until I received a surprise copy from the publisher. The synopsis sounded like something right up my alley.

I was a bit wary of the letter writing format, but I loved it. I loved the banter and the way their relationship progressed. The personalities of Cath and Scott come shining through and I really enjoyed only learning what was on the page.

This was such a sweet story set in the 80s about friendship, family, and everything in between. It follows Scott and Cath who have been best friends their entire lives. They've just graduated high school, so Cath is off to college while Scott is sticking around town pursuing music. It'll be the first time they are away from each other actually having to live their lives separately, only they don't really. It'll be the first time they are away from each other actually having to live their lives separately, only they don't really. They share the intimate details of their separate lives with the other via letters (as people actually did in the 80s - a time with no internet, cell phones, etc). This entire novel is made up of letters between the two..even scenes where the two are actually together are told in letters after the fact reiterating what went on. This is pretty unique and takes a moment to get used to, but it truly works with the story so well. There are some great references to songs released in the 80s staying true to the time. I honestly couldn't get enough of this sweet book.
