What people Say:

Sarah

(Source: I received a digital copy of this book for free on a read-to-review basis. Thanks to Perseus Books Group, Running Press and NetGalley.)

This was a YA sci-fi story, but it wasn't quite what I expected.

Kit was a bit of a mess in this book, she gave in to people, ran away from people, got dosed, hit, and was generally just all over the place, and it was hard to know what she was going to do next.

The storyline in this was about Kit, following her mother bombing somewhere, and having problems

This was a YA sci-fi story, but it wasn't quite what I expected.

Kit was a bit of a mess in this book, she gave in to people, ran away from people, got dosed, hit, and was generally just all over the place, and it was hard to know what she was going to do next.

The storyline in this was about Kit, following her mother bombing somewhere, and having problems with her family who all wanted to take her apartment from her basically. I did find the storyline in this quite confusing though, and I struggled to see how it related to the first book at all until right at the very end. Needless to say that I didn't really enjoy this book, and was quite disappointed with it after loving the first book so much.

Split the Sun is the second book in Tessa Elwood's Inherit the Stars series but it follows a completely different character than those in Inherit the Stars, on a completely different planet. Kit Franks is the daughter of a terrorist - her mother blew up a lab, killing people and unleashing a virus on the power source for the district. Now Kit needs to deal with the hatred directed at her because of her mother's actions, while also figuring out if her mom left some clues behind for her to follow.

I really enjoyed this one and it's a book I've been anticipating reading because I really fell in love with Inherit the Stars. While I was a bit disappointed Asa and Eagle weren't in this one at all, I did highly enjoy Kit's individual story. And just like Inherit the Stars, Split the Sun was an extremely fast-paced, dramatic read. There were times I felt for Kit a lot as it seemed like she never had a break to even rest, it was always one thing or another.

I really liked the story around Kit and her mother and their history. I think I would have liked a bit more world building, though we got it to some extent with The Prime and how Kit explained who he was. I think people could read Split the Sun before Inherit the Stars and not be too spoiled for the first book as there is very little link between the two - though I hope if there's another book, all the characters meet up. I wasn't sure about Kit and Niles' relationship at first - it seemed too good to be true and Niles kind of just appeared out of nowhere. I wasn't quite as invested in the relationship as I was with Asa and Eagle's, and I would have been okay if Niles backed away as Kit is a character who can stand on her own two feet.

Overall, I really enjoyed this book though I don't think I was quite as in love with it as Inherit the Stars. I really hope there is a third book!

Rachel Lightwood

I wish I had more to say about this book but it was terrible and completely forgettable. It's been exactly one week since I read this book and I barely remember anything about it. The biggest distinguishing feature about this book was the nonsensical plotline. There was so much going on and none of it was elaborated on so I spent way too much of my time floundering, trying to piece

together the key events. Honestly, this is the type of book that you just cannot write a recap for. Not because of

I wish I had more to say about this book but it was terrible and completely forgettable. It's been exactly one week since I read this book and I barely remember anything about it. The biggest distinguishing feature about this book was the nonsensical plotline. There was so much going on and none of it was elaborated on so I spent way too much of my time floundering, trying to piece together the key events. Honestly, this is the type of book that you just cannot write a recap for. Not because of poor memory (though that may be an issue in my case) but because it impossible to know what was happened! I still do not understand how certain events connected together or even what the protagonist was trying to achieve. The whole time I was reading it, I felt like I was a missing a vital piece of information - something that would connect the dots and give me that much needed moment. The synopsis revealed more to me than anything in the book did, and I'm still confused whether this had any major links to the first book or not. Was it just set in the same world?

On top of that, this book did not just suffer from poor world-building, it lacked world-building full stop. It was tough to imagine that the book was set in space. If you ignored some of the mentions of planets and stars you would think it was in your everyday post-apocalyptic world which, for a sci-fi story, is just sad. Also, the fact that world-building was also my biggest problem with

means that the author has not made any improvements in this area since writing her debut and that is never a good thing.

The characters did worsen the situation. I did not like a single one of them in all honesty. Kit irritated me because she was impulsive and made too many dumb decisions to blame it solely on luck. She jumped to conclusions and was quick to the blame. Her family was also a massive let down. I would have liked to explore their bonds after suffering a trauma like they did but they were all arseholes and I wanted nothing to do with them. Kit's romance with Whatshisname was another source of disappointment. I strongly dislike relationships built on lies and fraud, and it did not help that they had no chemistry together whatsoever. Their relationship was rushed and awkward - much the same as the romance of

in fact.

This book also had some troubling portrayal and commentary concerning suicide.

I would not recommend this book.

My Thoughts

Split the Sun, by author Tessa Elwood, is the second installment in the author's Inherit the Stars series. Elwood's story is a young adult, science fiction romance that takes place in a galaxy far, far away. It is a galaxy that is ruled by three houses; Fang, Westlet, and Galton. This story focuses on the House of Galton, the largest of the houses. 18 year old Kreslyn "Kit" Franks, is the only daughter of Millie Oen, former

In Split the Sun, the second and final novel in the Inherit the Stars series, we are introduced to a new leading character, Kit. It has been a while since I read the first novel, Inherit the Stars, so I

cannot say with full confidence that this novel does not link back to the original in any way other than the universe, but for me Split the Sun did not trigger any recollections of the first novel.

My fundamental issue with Split the Sun is that I honestly can't really tell you what the plot was supposed to be. Elwood works on a handful of different subplots, but none of them take center stage to grab the reader's attention. If I had paid closer attention to the synopsis of the book, it alone would have given me this clue as even the summary seems to be a bit everywhere with no real focus. I have never done this type of review before, but here's the synopsis from Goodreads below with my comments thrown in.
