James Patterson's name may be blazing on the cover and spine but it is because of the co-author, Chris Grabenstein, that I picked up this book. It's a truly delightful animal fantasy with themes of being different, lab use of animals, and the sense of family. I have an affinity for books suitable for the 7-11 age range and this is the perfect sort of book for kids that age ready to move onto a "real" chapter book. Each chapter is 3 to 5 pages long, with the majority of them 4 pages. Each chapter

Something actually happens in each chapter and they call out to read "just one more" chapter. Comparable to Avi's Dimwood Forest series but on a younger level. A satisfying read!

Isaiah, an electric blue mouse, escapes from an evil research laboratory but leaves his family behind. He manages to land in a very disorganized house with food all over the place, and a large contingent of resident mice who are glad to take him in. He also makes the acquaintance of a beautiful mouse, Mikayla. Mikayla can sing beautifully, but girl mice are "not allowed" to sing. Isaiah makes his way to a neighboring house as well, and meets Hailey, who learns that Isaiah is highly intelligent and can even communicate with her by typing on her computer. She helps Isaiah go back to the lab and rescue his family, and Mikayla saves the day by singing the mouse battle cry.

Strengths: The illustrations by Joe Sutphin were definitely a highlight here. There's an evil cat, evil humans, and enough mice gathered in the walls of the house to alarm the most rodent friendly. This is a jacketed hard cover, which is a departure for the "Jimmy" books. A must purchase for elementary libraries.

Weaknesses: Nothing really fresh here, but then, what ten year old has read Mrs. Frisby and the Rats of NIMH (1971)? Maybe this could be a gateway to some classic mice fiction.

What I really think: I was bothered by the fact that "girl mice aren't supposed to sing". That just seemed very... 1971. I was also bothered by the portrayal of rats as dirty and mean. Both things seemed odd and dated to me.

This book will be published in December; I received an ARC a couple of days ago. Chris Grabenstein has done another excellent job of creating a world for kids AND adults. And mice, of course. I look forward to reading this aloud to at least one of my grandchildren. The boys, who are older, should enjoy it on their own--but this is the type of book that they will share with parents (grandparents!) and friends. So much to appeal to their imaginations--mice in rainbow colors, singing mice, life in

I look forward to reading this aloud to at least one of my grandchildren. The boys, who are older, should enjoy it on their own--but this is the type of book that they will share with parents (grandparents!) and friends. So much to appeal to their imaginations--mice in rainbow colors, singing mice, life in a mischief, the world from a mouse's viewpoint, a literate mouse who can type on a computer! While having a good romp though, there is a lesson here--we are all different and that is what we have in common. Can't think of a better lesson for elementary and middle graders to learn nowadays. The mission of JIMMY Patterson books is to create eager readers. I finished Word of Mouse and really, really hoped that Isaiah would appear in more tales with his mischief. I think young readers will too.

Chris and James have done it again! This book I will admit started a little slow oddly enough despite a decent amount of action but once Isaiah reached his new mischief it hit the pedal to the metal! It's like Ms. Frisby crossed with Truckers with a little Ratatouille to boot! And it sets up a sequel beautifully! I could have done without the human friend, who while likable, didn't really add to much to the plot aside from a parallel story... Loved the ending and the main character especially! T
