I've never read a book written by her that I haven't loved. I truly don't know how she does it. But somehow she writes book after book that just does it for me. Suzanne Wright gets mad skillz!

Jesse Dalton pack enforcer for the Mercury Pack was a dark and damaged wolf. He lost his true

mate when he was a kid and it altered. He was lost in his pain for a long time. He walked around a shell of a person until Harley brought him back to life. Now he will stop at nothing to have the little Margay as his mate. Jesse was everything I have come to expect from SW's heroes. He was pushy, dominant, sexy, protective, and deadly. In other words a yummy wolf shifter that stole my heart. Harley Vincent was a lone half human/ half Margay shifter that lived in the human world. She had tried the shifter world when she was a child and they treated her like shit. All but the one boy, the one she had a huge crush on Jesse. After a one night stand 3 years ago Jesse is back in her life telling her that she will be his mate and that he is going to protect her. Making her kitty want to claw up his domineering face and rub all over him and purr at the same time. Harley was snarky, sassy, loyal, and totally kicked some ass. She was a very likable heroine.

I was really worried about the fact that Jesse and Harley weren't true mates. That was a totally different thing than what I am use to with Suzanne Wright. All the other couples have been true mates. I worried that Harley would play second place to the ghost of his dead true mate or that Jesse would feel like second place to the true mate out there that Harley never met. But I was wrong. I felt their love and connection. They felt like true mates to me. One of the things I really enjoy about shifter books is when the shifter has animal like characteristics. As an animal lover I enjoy picturing all those cute animal qualities. So to say that I loved every bit of the Harley's cute margay is a understatement. I am a huge cat lover and I was just giddy over the cute little margay's antics. Climbing trees, the purring, sleeping on her mates chest, and riding on the wolfs back omg it was just damn cute!

I loved everything about this book. I loved the plot. It gave me plenty of action. I enjoyed the cute kids especially Willow and the way she was always quoting lines from scary movies. Tray and Taryn made an appearance. I always love when I get time with Tray and Taryn(all time favorite couple). There was time with the pack mates and it's always good to get to know the pack better. Something is going on with Eli that has me wanting his story next although I wouldn't mind Bracken's story either! Overall this book just did it for me. Another great book by Suzanne Wright!

by Suzanne Wright is book two in her series, The Mercury Pack. This is a spin-off from her series entitled The Phoenix Pack. I will state that I highly recommend reading The Phoenix Pack series first as you may feel a little lost jumping into this book without having read the four books in the series that started it all. I have loved and adored this author's PNR books right from the moment I dived right into my first book by her. Ms. Wright pens funny and seriously

I will state that I highly recommend reading The Phoenix Pack series first as you may feel a little lost jumping into this book without having read the four books in the series that started it all. I have loved and adored this author's PNR books right from the moment I dived right into my first book by her. Ms. Wright pens funny and seriously sexy paranormal tales that are packed full of gorgeous alpha wolves who will do whatever it takes to claim what is theirs. Picking up a new book by this author always leaves me glad to be back in this shifter world full of horny wolf-men and the she-wolves that manage to capture their attention!

Jesse Dalton, an enforcer for the Mercury Pack, has never been the same since losing his true mate as a child. He lived with the pain of his loss for many years until one night changes it all. Or, in other words, one beautiful half-human, half-Margay shifter changes everything for Jesse. Harley Vincent, despite her half nature, prefers to live in the human world. She wants the freedom to do as she pleases without having to commit to the "good of the pack" mentality that comes with devoting one's life to a shifter pack. When his life is suddenly in danger Jesse shows up to offer his protection. Jesse has wanted Harley as a mate since they spent one lust-filled night together. He's not about to let her walk away again. She is his and all he has to do is convince her.

I absolutely LOVED Jesse and Harley. She is one fierce female that I would not want to mess with but, at the same time, she had this vulnerability to her. The banter exchanged between her and Jesse was hilarious and fun as Jesse slowly chips away at her defenses and etches his way into her heart. There was no remaining indifferent when you have a strong, sexed-up, alpha-wolf with a steely determination wanting to stake his claim. There was certainly a different take with this book as this is the first time that this author has written a book about two protagonists that are not true mates. I was a little worried about this. I had nothing to fear. The profound connection that Jesse and Harley shared was just as palpable and real as any of the true mate couples. Our couple gets their HEA and we, as the reader, finish with a deep sigh (or a cold shower). Just saying!

All in all,

is another awesome installment to this spin-off series and is just one more reason why I am seriously addicted to the fantastic paranormal books written by this author. Ms. Wright provides us with a wonderful erotic romance perfectly balanced with some action and suspense. I highly recommend this book and am definitely looking forward to more books.

You know what my problem is with this author? The fact that I'm always left wanting more at the end of the book. Apparently a 300 something page book is not enough for me. No, I want to linger and enjoy her world-building for as long as I possibly can.

You know what my problem is with this author? The fact that I'm always left wanting more at the end of the book. Apparently a 300 something page book is not enough for me. No, I want to linger and enjoy her world-building for as long as I possibly can.

As usual Suzanne Wright sucked me in her book with the first few sentences. Introducing a new type of shifter that's also a person we haven't seen before in the series. Harley Vincent, a margay shifter! I love it when we get someone new as a mate for the guys we already know and not a pairing between pre-existing people.

Harley isn't just any margay shifter though. She is half human, living in the human world with no pack or allegiances. A half shifter that's been targeted by anti-shifter extremists because of who her father is. Like most of SW heroines, Harley is a strong, dominant woman that takes no shit and much like her cat part, is indifferent to anything that doesn't keep her attention. I loved how her cat nature translated into several characteristics as a human as well. Her love of books and comfy book nooks completely endeared her to me. She also had the trademark Suzanne Wright sass.

A very down to earth, pragmatic and gifted violinist, Harley faced some of the same problems that Ally had in the first book. The Mercury pack apparently don't learn from past mistakes. Some of them did not welcome her with open arms. Ally and Shaya are the first to accept her into the pack unconditionally upon meeting her.

I'll be honest, my memory isn't the best and I didn't really remember much of Jesse other than he was one of Nick's enforcers. Here, we get much more of his background and character. Stubborn, headstrong, knows what he wants but can be closed off and cold, Jesse comes across as a classic dominant werewolf. A determined one, hell bent on making Harley officially his. Sadly, Jesse lost his true mate when they were children. But he has put that loss behind him as well as any feelings of guilt for moving on. That was so refreshing to read. The dead mate/fiance/wife plot can be so hard, not just to depict, but to have a meaningful impact in the storytelling without overshadowing the new couple. And I loved it here. Jesse had dealt with those feelings and re-made himself. He and Harley may not be destined for each other, but he is convinced that they belong together and pulls out all the stops to achieve it.

Harley always had feelings for Jesse but she's reluctant to plunge into a mating bond with him. I thought that her reasoning was logical and her fears very real. She never came across as irrational and her progression as a mate and a pack member was very nicely handled, for me.
