I'm also confused about this world we are in. There are lots of dinosaurs - most of them are HUGE. There are also people, and people-things like cars, houses, tricycles etc. Then there are also animals, modern earth animals like gorillas and kangaroos. But also dragons? I mean, WTF? WTF is going on here?

And in one scene, the text says

The picture is of a huge triceratops carrying a tiger under his arm. A human woman is chasing after him, wearing an expression of shocked disapproval. Are we supposed to believe this human being is his MOM? Please tell me 'no.' Sadly, there is even another illustration - the one with the diamantinasaurus - that suggests this is what the author was going for. o.O

Part of the beloved series by Yolen, this book revolves around the various ways that dinosaurs might choose a pet, if they were misbehaving. A colorful, fun, gorgeously illustrated of dinosaurs searching for their perfect pets. Sit with your little ones and see exactly what not to do. Great for group story telling as well. These books will not disappoint.

Using dinosaurs as their characters, this creative team delivers yet another lesson for children in humorous fashion due to the rhyming text and colorful illustrations with an old-fashioned feel. In this picture book, readers ponder how dinosaurs might choose the pet with whom they decide to spend time and bring home. In this picture book, readers ponder how dinosaurs might choose the pet with whom they decide to spend time and bring home. The author provides good advice about how and where to select an appropriate pet--not a kangaroo, for instance--and how to care for it once it has been brought home. The charm in this book and the others in this dinosaur-themed series is in how absurd those dinosaurs look when paired with a dragon, an elephant or a boa constrictor. I have to say that they also look pretty odd when holding onto a hamster, kitten or puppy as well, but readers will certainly get the book's point.

So many of the new pets look veeeerrrry dubious about what they're in for. Plus those farmers look far too happy to be selling cute, cuddly things to a carnivore.

Creepy illustrations aside, the text is cute. Typical "what not to do" from Yolen, but I'm sure the kiddos will love it.

Cute book, similar to the rest of the books in the series. My daughter is a bit old for it now, but she still enjoyed revisiting her dinosaur friends.
