But, most of all, I think it acutely depicts the fate of our judicial system, conceived by men who thought punishment would be the detriment to crime, but which ironically turned out to be the incitement to more heinous crimes.

True, countries like Norway have understood the importance of humane treatment in restoration, as opposed to humiliation in confinement, but, in most countries, the old-fashioned system still reigns, because it's the easiest to sleep in the status quo.

Let's hope this will change someday.

This may come as a surprise considering how much I complain about psychotherapy, but I LOVE SIGMUND FREUD. This is not just transference, and no, he doesn't remind me at all of my father; I

believe Freud was a great genius, and far more importantly, that he was a fantastic writer and very interesting person. I also believe that Freud is one of the most unfairly maligned and willfully misinterpreted figures of the past hundred-or-so years.

This may come as a surprise considering how much I complain about psychotherapy, but I LOVE SIGMUND FREUD. This is not just transference, and no, he doesn't remind me at all of my father; I believe Freud was a great genius, and far more importantly, that he was a fantastic writer and very interesting person. I also believe that Freud is one of the most unfairly maligned and willfully misinterpreted figures of the past hundred-or-so years.

If you haven't read him (HIM, not his theories), or if you have but your mind was so full of distracting, disparaging thoughts about how he was a sexist pig or whatever that you couldn't concentrate, I encourage you to go back and read him again. He's a lot of fun, extremely interesting, and surprisingly humorous -- check out his short piece on jokes for a good time. This book here explores dark themes and ends on a somber note, as one might expect of a European book about civilization written in 1931.

Anyway, if I were to stay up all night long talking and doing lines with any figure, alive or dead, throughout human history, there is no question in any structure of my mind who it would be.

'Civilization and its Discontents' is Freud's miniature opus. It is a superficial masterpiece that stretches further than any of his other works; he is reaching for an explanation for human nature in terms of the id-ego-superego structure of the individual as he exists in civilization. For Freud, human beings are characterized by Eros (Sex Drive) and Thanatos (Death Drive), which remain in opposition to one another. 'Civilization and its Discontents' is Freud's miniature opus. It is a superficial masterpiece that stretches further than any of his other works; he is reaching for an explanation for human nature in terms of the id-ego-superego structure of the individual as he exists in civilization. For Freud, human beings are characterized by Eros (Sex Drive) and Thanatos (Death Drive), which remain in opposition to one another. This small book is filled with as many interesting ideas as any work of modern philosophy. Freud adopts (perhaps a bit hastily), a Nietzschean position with regard to the role of religion and institutions of social morality which curb and shape primordial human drives. As a result, human beings, and civilizations as a whole remain unsatisfied and suffer from neuroses. He concludes with a discussion of human aggression, which manifests itself in the form of communalized human aggression. He wonders as to whether or not human beings will be able to overcome this drive. It seems to me that this question remains the most important for human beings in the 21st century. Will we be able to overcome our Thanatos and survive the destructive powers that we have created? I suspect that Freud will be better remembered as a thinker and philosopher than as an analyst or doctor precisely because he asks the questions that remain relevant for civilization today, and are likely to remain imperative in the future.

This book explains why you could be standing behind that scruffy ponytailed hipster in the checkout lane at the grocery store, with his artisanal pickles in one hand, and his smoking hot girlfriend in the other, and suddenly feel the urge to lunge at him and tear the larynx out of this throat, but don't. Instead you grit your teeth and call him a douchebag under your breath and then later, you shudder. Where did that impulse come from, you wonder. The answer: you're an animal, buddy. That fancy Master's degree can't conceal the truth: you're a bloodthirsty, sex-crazed animal. A status-seeking primate. Go on, if you dare, look inside yourself. You'll see the truth. Just try to keep your clothes on.
