This book explains 7 Habits that can make a person more effective personally, professionally, and in family life. Covey shows how to build the healthy relationships that are key to an effective life. This classic is well worth reading for its perspective and practical advice.

: Covey frequently references his Christianity. He says the Habits are based on "Correct Principles" (aka Natural Law) found in Judeo-Christian scriptures and common to major religions.

: Covey frequently references his Christianity. He says the Habits are based on "Correct Principles"

(aka Natural Law) found in Judeo-Christian scriptures and common to major religions.

: Covey says you must maintain a balance between production (P; your output) and production capability (PC; your ability to produce). You must stay healthy and renew yourself (see Habit 7) or you'll get burned out and become ineffective. He uses the fable of the Goose and the Golden Egg as a metaphor.

: Covey says the Habits lead you from dependence to independence to interdependence (cooperating with others to achieve a common goal; producing things greater than the sum of their parts).

You choose how to respond to what life throws at you. Take responsibility for your actions.

Choose your short-term, daily behavior according to the plan you have for your entire life. Think about the legacy you want to leave. Put things in perspective; what would you want people to say at your funeral?

Ever since I worked at the bookstore at Virginia Tech, I would watch the douchebag* business major undergrads buy this book for their classes and look down upon them, and the book by association, as, well, douchebags.

*This is not to say that all undergrad business majors are douchebags. I've met one really really awesome one. Additionally, after working at a major university bookstore, a majority of all undergrad students can be fairly classified as douchebags. Jebus.

Consequently, I never picked up this book. I hated the people who were reading it for class. I hated

the people who were assigning it for their classes. I hated my job and I hated the area that I was living in. (I was, yes indeedly, a hater)

Obviously it wasn't the right time for me to read it.

My current boss (who is only occasionally a douchebag) is doing this huge self-help/life plan program, and from it, there is a major reading list. As I am a wee bit addicted to books, I immediately agreed, and when I started searching on Amazon for the reading list, "7 Habits" appeared on pretty much every single page. So I picked that one up too.

Excellent decision. I chose to read it first. It has taken me, probably three weeks to read it. I have ordered (with my boss' blessing) "The 8th Habit" and will read that shortly.

Every single page I found something that made me put the book down for a couple of minutes and think about it. I already know that I'm going to have to re-read this at some point in the near future. I would say this is required reading for humanity, but my father would have been the exception to that rule.

I think the sign of a great book is when, right inside the cover there is a pull out brochure that encourages you to order more of the authors products - that's some quality shit when you see that.

But the book itself, well it has charts: flow charts, boxed charts, circle charts, up and down charts, sideways charts, charts with arrows, charts with triangles and charts with dotted lines.

This book uses words like "synergy" and "proactive"....repeatedly

This book has "application suggestions".

This book is shiny and it has 6 pages of recommendations before the title page.

- Hon, did you sleep okay? You look kinda weird.
- Well, I don't know how to say this...
- Yes?
- I had this dream where I talked with God.
- Was She black?
- No, I'm serious! I did! It was, like, utterly real. It was the most real thing that's ever happened to me.
